PATENT

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

Applicant: Jeffrey S. Mailloux et al.

Examiner: Hong Kim

Serial No.: 08/984,562

Group Art Unit: 2751

Filed: December 3, 1997

Docket: 303.623US3

Title: MEMORY DEVICE FOR BURST OR PIPELINED OPERATION WITH  
MODE SELECTION CIRCUITRY**RESPONSE UNDER 37 CFR § 1.111**Commissioner for Patents  
Washington, D.C. 20231**REMARKS**

Applicant has reviewed and considered the Office Action mailed on May 3, 2000, and the references cited therewith. No claim is amended, no claim is canceled, and no claim is added; as a result, claims 22-32, 59-61, and 63-65 are pending in this application.

**§102 Rejection of the Claims**

Claims 22-32, 59-61, and 63-65 were rejected under 35 USC § 102(b) as being anticipated by Manning (U.S. Patent No. 5,610,864). Applicant respectfully traverses.

The statutory language of section 102(b) provides that "[a] person shall be entitled to a patent unless ... the invention was patented ... more than one year prior to the date of the application for patent in the United States." The patent date of Manning is insufficient to support the rejection under section 102(b). Thus, the rejection is improper. Reconsideration of the rejection is respectfully requested.

The MPEP requires that "[t]he identical invention must be shown in as complete detail as is contained in the ... claim." See MPEP sec. 2131. The Office fails to show that Manning discusses the identical invention, which is claimed in applicant's application.

**Claims 22-32 and 59**

The Office has failed to produce a *prima facie* case of anticipation. For example, claims 22-32 and 59 recite "switching between a burst mode and a pipelined mode." Applicant cannot find and the Office has failed to show this recitation in Manning. The Office noted that Manning discusses a "pipelined architecture" at column 5, lines 43-50. And the Office indicated that Manning discusses "switching between burst EDO and standard EDO modes of operation" at
